O que (ainda) não sabemos

“Há mais coisas no
céu e na terra,
Horácio, do que sonha
a nossa filosofia??”

Para onde foi a antimatéria?

- Quantidades iguais de matéria e antimatéria “deviam” ter sido produzidas no Big Bang
- Medimos a violação de uma simetria fundamental (CP) que pode explicar a diferença, mas precisamos de encontrar outras fontes
- Violação CP no sector dos leptões? Ou no sector do Higgs?
